PREFACE

It has been an amazing journey to see how the PRCF organization has progressed and developed over the last few years. From a small first project in 1999 supporting Dayak women weavers, to the ongoing multifaceted biodiversity conservation and socioeconomic development projects. The organization's work is characterized by the single overarching theme of “working with people to help protect their natural environment.” This theme serves as a prime directive to involve local stakeholder communities in all aspects of project planning, development, monitoring, and evaluation.

Our work in Indonesia, which started in West Kalimantan, has now expanded to include North Sumatera. Following PRCF's overarching theme, our focus is on community-based conservation of biodiversity and sustainable management of natural resources, while providing critical livelihood support services to stakeholder communities to enable sustainable livelihood transitions. The goal in all cases is to develop the capacities of local people in a way that leads to people owning and eventually taking over the project and ensuring the maintenance of outcomes. This is done through conservation and development measures aligned with contextual and cultural realities and livelihood needs.

The organization's achievements in Indonesia and elsewhere could not have happened without the support of its highly professional and dedicated staff, some of whom have been with the organization since its beginning. Similarly, the organization's accomplishments would not be nearly as significant as they are, if it were not for the support of our strong local community and government partnerships.

I am confident that PRCF Indonesia will continue to be effective in the coming years, and look forward to experiencing an increased state of conservation management led by self-reliant communities who maintain solid cultural identities.

Dr. L. Fernando Potess Sanchez
PRCF Foundation Director President

1. BACKGROUND

Established in 1995, PRCF (People Resources and Conservation Foundation) is a non-governmental, non-membership, non-profit organization incorporated in the United States, under Section 501(c)(3) of the US Internal Revenue Code.

PRCF's purpose is, "To strengthen local participation in biodiversity conservation and ecosystem functioning, through measures that address the protection and wise use of natural resources, and the socio-economic development and cultural revitalization of affected communities".

PRCF is currently active in several countries in Southeast Asia as a federation of semi-autonomous Country Programs. Federated PRCF members oversee small and high priority projects, and then become nationally registered independent non-governmental organizations. One of them is Yayasan Pelestari Ragamhayati dan Cipta Fondasi Indonesia (PRCF Indonesia).

PRCF-Indonesia was registered as a legal entity of the Republic of Indonesia on October 20, 2000, through notary Eddy Dwi Pribadi, S.H., deed number 93, Saturday, October 20, 2000.

The registration number at the Pontianak District Court Office is 08/YYPend./2001, on Wednesday, January 31, 2001, and the Taxpayer Identification Number (NPWP) is 1.858.891.3.701.

In an effort to encourage the professionalism of organizational management, on Wednesday, November 22, 2002 through notary Eddy Dwi Pribadi, S.H., with deed number 55 of 2002, the organizational form of PRCF Indonesiachanged to Yayasan PRCF Indonesia and, on May 14, 2018, a change of name was determinedfor the establishment of the institution, becoming "Yayasan Pelestari Ragamhayati dan Cipta Fondasi Indonesia".

This foundation is domiciled in Pontianak in accordance with Notarial Deed Number 281, dated August 24, 2018 made by Notary Budi Prasetyono, SH domiciled in Pontianak City. Its ratification is based on the Decree of the Minister of Law and Human Rights of the Republicof Indonesia Number AHU-0011900.AH.O1.04 of 2018 concerning Ratification of the Establishment of a Legal Entity of Yayasan Pelestari Ragamhayati dan Cipta Fondasi Indonesia. Taxpayer Identification Number (NPWP) 86.149.127.2-701.000.

PRCF Indonesia was born from an effort to emphasize the following thematic priorities to address complex and interlinked environmental and social problems:

- Finding solutions and contributing with several efforts to conserve biodiversity and sustainably manage natural resources.
- Raising awareness and promoting community concern in efforts to protect and utilize natural resources wisely.
- Exploring and reviving local wisdom in an effort to strengthen the community's cultural identity.
- Capacity building of local communities with regards to sustainable socio-economic development.

2. VISION AND OBJECTIVES

The vision of PRCF Indonesia is to promote biodiversity conservation that supports ecosystem functions and provides sustainable use of natural resources, enabling the independence of local communities through livelihood capacity building while maintaining traditional values.

PRCF Indonesia emphasizes the importance of local community participation in determining the success of nature conservation and community development programs. Communities are always directly involved in various project aspects, including surveys, planning, implementation, monitoring and evaluation.

PRCF Indonesia's emphasis on participation combines the long-term experience of the individuals involved with site-specific and innovative management strategies that engage, empower and benefit local stakeholders, and promote the conservation of biological resources on the other.

To strengthen local participation in the conservation of biodiversity and ecosystem functions, through the protection and wise use of natural resources, and socio-economic development and cultural revitalization that impact the community.

-PRCF Indonesia Foundation Objectives

3. SCOPE OF ACTIVITIES

The scope of PRCF Indonesia's activities consists of,

- Research that supports the conservation of globally threatened species and addresses the lack of knowledge about them.
- Improving the capacity of local communities in the management of natural resources and critical habitats.
- Community-based conservation management that supports local livelihood and institutional development.
- Mitigate threats to biodiversity and local livelihoods due to climate change, and develop payment for environmental services schemes through corporate finance partnerships to enable long-term support for conservation management and livelihood support.
- Increasing environmental awareness of the use of natural resources through advocacy and counseling to the community.
- Encourage community self-reliance, revitalization of cultural arts and ethnic identity.

There are six points of the PRCF Indonesia Foundation's scope of activities that embody the foundation's goals, including conservation, economy, and communities self-reliance.

4. TRACK RECORD

4.1. Women Empowerment and Strengthening - Community Cultural Identity Program. Time: 1999 to Present

Program Objective:

- Increase women's participation in natural resource management.
- Increase women's capacity in productive business development.
- Preserving the art of traditional weaving culture.

Revitalization and Restoration Dayak Ikat Weaving:

- Training for weaving skills
- Develop and build the capacity of community-based Weavers Cooperative
- Introduce micro-credit schemes for the Weavers.
- Cooperative Develop market access for the Weavers Cooperative
- Develop cotton crops and production systems on sustainable natural coloring dyes.
- Socio-cultural research on the ikat Dayak culture.
